EXPERIENCE

WSM ANALYST, SHELL PAKISTAN LIMITED-CHIP TRAINING AND CONSULTING (PVT.) LTD

JUNE 2021-PRESENT

Primarily responsible for data management of 42 sites (petrol pumps) in the North region. Real time data analysis to analyze each tank's trend and check for any manipulation or other causes of unusual variances (if occurred).

Immediate engagement with site management and territory manager to identify and solve the data quality related disputes. Conducting PLIP-A (product loss investigation procedure) at the site in case the unusual data trend prevails. Reporting the findings to line manager and 'Shell Global Wetstock Team'. Coaching the newly hire site managers for wet stock data reconciliation methods following the HSSE protocols/SOPs.
