Health Systems Management  
Research Process I and II  
Health Planning  
Health Care Financing  
Applied Nutrition Hospital Management  
Advanced Epidemiology & Biostatistics Community-based Reproductive Health Interventions  
Health Policy Research Process III  
Proposal and Dissertation writing  
Practicum and Report writing

**KHYBER MEDICAL UNIVERSITY, PESHAWAR**  
**BACHELOR OF DENTAL SURGERY (BDS) (59.00%)**  
**2003 - 2009**

Anatomy, Histology, etc.  
Physiology & Biochemistry  
Dental Materials & Dental Technology  
Pakistan Studies  
Islamic Studies  
Oral & Dental Anatomy, Oral Physiology, Histology & Tooth Morphology  
General & Dental Pharmacology & Therapeutics  
General Pathology & Microbiology  
Surgery  
Medicine  
Oral Medicine  
Oral Pathology & Bacteriology  
Prosthetics  
Pre-Clinical Prosthetics (2nd year)  
Clinical Prosthetics (3rd & 4th years): complete dentures, immediate dentures, crown & bridge work, orofacial prosthetics  
Conservative Dentistry  
Pre-Clinical Operative Dentistry  
Clinical Conservative Dentistry  
Endodontics  
Periodontia  
Paedodontics  
Community Dentistry  
Orthodontia & Radiology  
Orthodontia  
Radiology  
Oral Surgery, Anaesthesia, Dental Forensic Medicine & Toxicology, Medical / Dental Ethics & Dental Practice Management

## Experience

---

**RIZ CONSULTING REPRESENTING GLOBAL CDC AND IGH TEAM FOR PAKISTAN EPI/PEI**  
**PROVINCIAL EPIDEMIOLOGIST/DATA ANALYST**  
**2022 - Currently Working**

Analyze epidemiological data and work with MOH and other international organizations (NGOs, and other Public Health organizations) to create solutions to problems that arise in polio eradication and VPD program implementation and outbreak response.

Participate with Polio Eradication Branch team leads in development and implementation of field project plans addressing routine immunization, data quality or surveillance, outbreak investigation, and vaccination campaigns. Use historical polio data to improve outreach activities.

Analyze WHO-EMRO, or host country partner epidemiologic data as it relates to VPD surveillance, disease transmission and outbreaks for use by Donor in documentation, data management and legacy planning.

Provide evidence-based technical advice for implementation of polio eradication activities (such as immunization campaigns or supplemental immunizations) that are appropriate to the circumstances in endemic countries and/or countries with outbreaks of polio or other VPDs such as measles.

Participate in activities designed to promote polio, measles and other emerging vaccine preventable disease eradication, routine immunization, data quality and surveillance of new vaccines.

Attend meetings and webinars with international and local partners in order to stay abreast of the most current developments in the outbreak and status of worldwide eradication.

Incorporate and share lessons learned and best practices developed during work conducted on Donor polio eradication projects with country and field staff.

Provide technical advice to Donor's Strategic Information and Workforce Development (SIWD) Branch of the Global Immunization Division (GID) regarding the training and field work of National Stop Transmission of Polio (NSTOP), and Stop Transmission of Polio (STOP) teams.

Provide technical assistance to the assigned province for Polio Eradication Initiative (PEI) in terms of real time identification of hotspots of viral transmission, as well as providing support in field investigation and response to WPV, vDPV and EVI.

Travel frequently to respond to the provincial EOC requests to extend support in the identified low-performing districts and high-risk areas and UCs in terms of the active case search/active case finding of AFP (Acute flaccid paralysis), review of medical records, and provide technical assistance at the district / health facility level as needed.

Perform data management, analysis, impact assessment and reporting of activities in compliance with the Outbreak Response Plan.

Analyze immunization data from all sources, identify gaps and suggest corrective measures at Provincial EOC

Ensure that the updated global and national guidelines are adequately applied and used at all levels for investigation of AFP cases and provide support and critically review weekly/monthly surveillance data and identify and mediate gaps, if any.

Take part in pre, intra and post campaign phases and to support different activities as per provincial needs with an aim of ensuring that the desired highest quality of the SIAs campaign is achieved.

Participate in and facilitate training workshops aiming at capacity building of human resource at all levels (Province, district, and UC) for SIAs, Essential Immunization and AFP/VPD Surveillance

Conduct in-depth statistical analysis and data triangulation to help the Program in monitoring its progress and impact of its interventions, including performance related to AFP surveillance, SIAs, monitoring, Missed Children Coverage, preparing reports/ presentations in term of trend analysis, and managing geospatial database for developing maps using Tableau, GIS and other relevant software.

Prepare PEI situation reports and activity reports of districts and provincial levels and update these on a regular basis.

Undertake other relevant duties as directed by the Senior CDC advisor and Senior Data Analyst CDC/IGH

**HEALTH DEPARTMENT**  
**DISTRICT HEALTH OFFICER (DEPUTY)**  
**2022 - 2022**

Head of the district health administration and responsible to achieve the health goals in the district through proper planning and budgeting effective implementation, human resource management, monitoring service quality, and ideally allocating resources to most effectively meet local population needs.

To ensure effective implementation and achievement of the targets under the National/provincial vertical programs through supportive supervision i.e. Expanded Program on Immunization, Polio Eradication Initiative, Maternal and neonatal child health, National TB control Program, National Leprosy eradication program, National AIDS and Hepatitis control program, National Program for control of Blindness, Integrated Diseases surveillance and response program, Integrated Vector born Disease control Program, Mental Health Program, Thalassemia and safe blood program and other programs working the District.

Facilitate, coordinate, supervise, monitor and implement the provision of all the Health sector Atcs, Policies, rules & regulations and Guidelines for the public safety and interest.

Monitoring and supervision of all promotive, preventive curative, rehabilitative and restorative healthcare activities in the district.

Responsible for coordination with all the Government departments, INGOs/NGOs, partners organizations, social and community leaders and public representatives in planning and implementation of health and family planning programs.

Prepare an annual data base for emerging pattern of disease through collection of data and plan appropriate intervention for effective prevention and control of diseases in the District.

Effectively implement the diseases identification and early notification system for the seasonal diseases and outbreaks and take effective steps for prevention and control.

Ensure surveillance and effective measures for the prevention and control of the VPDs.

Identify cases of maternal and child health morbidity and mortality and take measure for reduction.

Ensure effective and prompt implementation of ongoing projects and achievements of physical, financial targets through respective officers.

Supervise through review meetings with Hospital in-charges, nursing and paramedical staff in district and visiting the Health facilities and maintain HMIS and Validating HMIS data.

Carry out surprise inspection of all the subordinate offices and take follow actions and ensure availability of all health workers and furnish monthly reports to regional and provincial authorities.

Posting, transfer and hiring including redistribution of medical, nursing and paramedical in district and ensure that the problems and grievances of the staff are solved smoothly.

Identify low performing institution and workers and remedial actions for optimum performance including due actions against non-performers.

Ensure timely and adequate supply of drugs and equipment with adequate buffers for all emergencies and particularly epidemics and floods, maintaining contingency plan for disasters.

Preparation of district health plan and operations of PHCs and SCs operationalization.

Feasibility and proposal reports preparation, preparation of PC-1 for civil work, land identification for Primary and secondary healthcare and opening new health facilities.

Ensure the availability of stocks, human resources, equipment, and infrastructure and check annual development schemes,

monitor developmental projects and proposals.  
Prepare an annual budget for the facilities in their respective districts.  
Ensure proper utilization of funds as per the guidelines and GFR provisions and furnish accounts for all the funds received in district including societies and committees for health facilities.  
Ensuring auditing procedures are completed well in advance and audit reports are furnished to all the concerned authorities.

**WORLD HEALTH ORGANIZATION (WHO)  
NATIONAL CONSULTANT (KHYBER PAKHTUNKHUWA)  
2021 - 2022**

Output 1: Develop a national guideline on COVID surveillance and national Adverse Event Following Immunization (AEFI) and Pharmacovigilance guideline for the new Covid-19 vaccine.

Deliverable 1.1: Work closely with the Emergency Operation Center (EOC) and National institute of health (NIH) and AEFI National committee to provide technical advice on the institutionalization of data collection on COVID and AEFI and.

Deliverable 1.2: Promote both National and Provincial local milestones and indicators (by adding new indicators and modifying current indicators) for measuring the COVID and COVAX Adverse Event following Immunization (AEFI) reporting and surveillance performance

Output 2: Support capacity building of surveillance staff on COVID surveillance and COVAX AEFI field investigation, detection, data management, and response.

Deliverable 2.1: develop a plan for the training of the field staff in the hospitals and primary health care facilities.

Deliverable 2.2: Conduct a pilot formal training of the trainers and the trickled down training at different levels.

Deliverable 2.3: Ensure making use of the available surveillance system in Polio Eradication Initiative and integrated disease surveillance and VPDs surveillance

Deliverable 2.4: Coach the surveillance officers on conducting investigation for the Adverse events following immunization for COVID vaccination.

Output 3: Prepare regular reports on the COVID cases/Adverse events analysis in coordination with Emergency Operation Center (EOC), National institute of health (NIH) and EPI.

Deliverable 3.1: Deliverable 3.1: Liaise with surveillance officers to coordinate on COVID surveillance and COVAX AEFI surveillance activities.

Deliverable 3.2: Assess burden of disease and any Adverse event following immunization of COVAX at National level.

Deliverable 3.3: Measuring the impact of COVAX vaccine effect on the burden of the COVID-19 cases by making analytical comparison of the Covid-19 disease incidence rate at different geographical areas before and after the vaccination..

Deliverable 3.4: Mapping the COVID cases to identify the high-risk areas

**DEPARTMENT OF HEALTHH  
HEALTH MANAGER (COORDINATOR EPI & POLIO ERADICATION AND SURVEILLANCE)  
2015 - 2021**

To ensure proper implementation and smooth conduction of the EPI (Expanded Program on Immunization) & PEI (Polio Eradication Initiative) activities in the district and focus the thematic and high risk areas.

Assists immediate supervisors in developing Individual Operating Plans in the light of Annual Operating Plans.

Facilitates development of field operation plans & oversees their implementation.

Coach staff members to develop and implement capacity building and other plans to comply with Expanded Program on Immunization standards and procedures.

To lead the EPI and PEI frontline workers for smooth implementation and execution of the program planned activities at District level and assist in preparation of the Reports, data base up gradation etc and also develop and implement capacity building strategies of the polio Teams, Area supervisors and District Polio Monitoring Team.

Envision the universal, sustainable, and equitable access to safe drinking water, sanitation and hygiene, as well as the elimination of open defecation.

Community engagement in WASH to connect communities and other emergency response stakeholders to increase community's control over the impact of the response to brings together the capacities and perspectives of communities and responders.

Building toilets and hygiene facilities, safe drinking water reservoirs through supporting partners organizations and Public health engineering division.

Provide technical assistance in monitoring, evaluation and execution of the EPI and PEI and VPD (Vaccines Preventable Diseases) surveillance activities in the District.

To provide technical input in planning and designing the detailed implementation plan and supervise the trainings on EPI and PEI for the Public/Private sector Health care providers, facilitate the capacity building initiative for facility and community based health workers, to ensure proper and regular documentation and reporting on EPI/PEI and VPD surveillance activities of an effective supervision and monitoring system for EPI and PEI activities.

Ensure regular meeting of the District Polio Eradication Committee and Union Council Polio Eradication Committees in the District.

Polio Campaign Resource Micro-planning and Planning Logistics Distribution to the UCsl.

To plan and implement the NEAP (National Emergency Plan) Indicators for Special Immunization Days (SIAs). Arrangement of meetings of District polio Eradication Committee and Union Council Eradication Committee District level. Conduction and arrangement of Measles Campaign ion the District.

To coordinate and report the overall monthly activities of Routine Immunization with Province. AFP & other VPDs surveillance and follow ups in District Shangla. Health awareness and Community Sessions arrangements at UC and District Level.

Specimen Collection of the VPDs/Infectious Diseases for Laboratory (NIH) Investigation and its follow up.

Evidence based planning for communication,, monitoring and evaluation, reviewing and reporting; or experience in data management within data driven projects or programs; or extensive field experience in data collection, management, analysis, and reporting.

To collect information and follow up Acute Flaccid Paralysis cases and other preventable Diseases.

To arrange social awareness and social mobilization sessions in the different Union Councils of District Shangla regarding the Polio Eradication and Routine vaccination.

To implement the plans of Micro Nutrients in the NIDs in the District.

Train the trainers for the frontline workers of Polio and EPI.

Closely monitors the performance of her immediate supervisors and the Field workers, takes corrective actions, and offers technical support to the staff in all aspects of the EPI/PEI planning, implementation, and reporting activities; Finds out staff capacity building needs and ensures that the staff receives timely and adequate training.

**DEPARTMENT OF HEALTH  
HEALTH MANAGER ( DISTRICT COORDINATOR MNCH AND MOTHER CHILD HEALTH PROGRAM)  
2012 - 2015**

Ensuring that proposed emergency Reproductive Health interventions are guided by guidelines and protocols, including the following services/activities: Family Planning, STIs prevention and treatment, Post Abortion Care, ANC/PNC, Facility deliveries, Emergency Obstetric Care (BEmONC) or referrals for CEmONC, and Clinical Care for Survivors of Sexual Assault (CCSAS).

To oversee the Reproductive Health program in the field locations and supervising the implementation of the three core aspects of reproductive health: 1) Safe motherhood and Family Planning; 2) Post Abortion Care (PAC) and; 3) Emergency Obstetrical Care, under the supervision of the District Health officer and Provincial Program Manager.

Ensure that all stated reproductive health goals and objectives are met, that projects are monitored, and that reports are submitted in a timely manner;

Work closely with the Population welfare Department/teams at the field level to ensure coordinated and integrated activities Provide technical oversight to field-based reproductive health staff of Secondary healthcare hospitals, with an emphasis on staff capacity building, supportive supervision and mentorship.

Work with the M&E teams to ensure the smooth running of the M&E system: from data collection and facility level to weekly data compilation reports, databases and analysis of the data to inform decisions and report-writing.

To provide technical advice and strategic guidance to District Health teams and Provincial Health team, partners and local entities, etc. to promote the design and execution of improved health services delivery.

Led district purchase/financial committees in purchasing arrangements of supplies and goods for health services in Pakistan.

To support the district financial and audit teams in carrying out the financial and budgetary proposal for the health department specifically the vertical programs i.e. EPI, MNCH and Program programs.

Continuously assessing reproductive health and MNCH needs and suggesting new projects to address identified unmet needs;

Promoting a culture of learning whereby lessons-learned and good practices are documented and shared for institutional memory;

Undertake reproductive health capacity-development activities/training for reproductive health and clinical health staff; Develop and maintain effective working relationships with all stakeholders.

Ensure that information from coordination meetings is shared internally and with other sectors, as appropriate,

To design, implement and manage the program and to build the capacity staff.

Ensure proper and timely implementation of current programs and grants.

Write and submit reports as required to the District Health officer and Provincial Program Manager and partners

Assess current reproductive health and MNCH services situation.

Ensure proper collection and analysis of demographic data associated with reproductive health and MNCH Program.

Regularly analyze data in conjunction with staff in order to build their skills in tracking reproductive health trends in the District and developing appropriate responses and Conduct surveys as necessary.

Ensure appropriate treatment of beneficiaries in general, and mainly those requiring clinical reproductive health and MNCH services within District and ensure that the system for referral cases is functioning efficiently and with optimal results.

community orientations on health hygiene, hand washing and promotion of Core Community Hygiene and Sanitation Practices.

Distributing menstrual hygiene products.

Community engagement & hygiene promotion to prevent cholera, diarrhea and other disease outbreaks

Continually monitor and evaluate program indicators, objectives, outputs, & impact

With supervisors, introduce standardized strategies and protocols for reproductive health as a component of a comprehensive & fully integrated primary health program

DEPARTMENT HEALTH  
HOUSE OFFICER  
2009 - 2010

Diagnosis and management of the patients

## Certification

---

**Developing Action Plan for Movement for Immunisation agenda 2030** From (Geneva Learning Foundation)  
- 22nd May, 2022

Identification of immunisation challenge in Pakistan context based on evidences  
Cause-Effect analysis of the Challenge/Problem  
Sorting out of the Solution for the challenge/Problem  
Making plan of action to solve the problem and bring improvement

**Health Economics and Financing** From (UNICEF)  
OWDqiVzqmK - 22nd January, 2022

Health system evaluation and analysis  
Evaluation techniques and interventions  
Health financing and prioritisation

**Boosting Leadership to Activate Communities** From (Bosst and SABIN vaccines institute)  
- 1st December, 2021

Tools and intervention to activate the communities  
To boost community engagement in healthcare planning and its implementation

**COVID-19 Peer Hub review** From (Sabin Vaccines, Geneva foundation)  
2020 - 9th January, 2020

COVID-19 peer hub reviews

**Contact Tacking and Tracing of COVID-19 and other Outbreaks** From (John Hopkins University)  
2020 - 8th January, 2020

Contact Tacking and Tracing of COVID-19 and other Outbreaks

**Boost Scholar Level-1 Certificate in Adaptive Leadership for Immunization** From (Sabin Vaccines Institute and The Geneva Learning F)  
2020 - 7th January, 2020

Adaptive Leadership for Immunization  
Inter personal communication skills  
Adverse events following immunization (AEFI)  
faction mapping

**Maternal and Perinatal Death Surveillance and Response (MPDSR) Framework Maternal & Perinatal Death** From (The Pan American health Organization (PAHO))  
2020 - 6th January, 2020

Maternal and Perinatal Death Surveillance and Response (MPDSR) Framework Maternal & Perinatal Death still birth

**Certificate in Health Research** From (khyber Medical University Peshawar)  
CHR 2019 - 3rd January, 2020

Research Methodologies, study Designs, Epidemiology and biostatistics

**Promotion Training for Health Managers (Management Cadre)** From (Provincial Health Services Academy Peshawar)  
April 2019 - 4th January, 2019

mid level managers courses  
project management  
general financial rules  
healthcare management  
primary and secondary healthcare management  
tertiary healthcare management

**6th Front line/Basic Feild Epidemiology and Laboratory Trainings Program (FELTP)** From (NIH Pakistan with collaboration of CDC Atlanta)  
2018 - 8th January, 2018

Disease surveillance  
outbreak investigation  
public health interventions

**Mid level Health Managers trainings on Expanded Program on Immunization** From (Department of health, EPI with collaboration of WHO)

sept 2017 - 9th January, 2017

EPI program policy  
EPI program mandate  
RED rec Micro planning  
Supportive Supervision  
Effective Vaccines management  
Cold chain and supply chain management system

**10 cohort Screening Course of Field Epidemiology and Laboratory Trainings Program (FELTP)** From (NIH Pakistan with collaboration of CDC Atlanta)  
2016 - 11th January, 2016

Applied epidemiology and Public health  
disease surveillance
