		Feb -2016 to Oct-2017	Comsats Internet Services, Islamabad (Unity 3D Developer)

Projects and Academic Experiences

Human Resource Management System (Company Project)

This web application was developed using PHP MySQL, Bootstrap, HTML, CSS JavaScript, Modal, and Ajax. The basic idea behind HR management is to empower employees and managers and to provide them a self-service to manage their common day to day tasks that ultimately frees up HR staff for their task.

.Net Projects (Company Projects)

Several window and web applications were developed in .net.

- Meeting minute application was developed in windows. This form takes the meeting minutes like what was the agenda of meeting, tasks performed this week, what deadlines were met, what will the next tasks according to the deadlines and generate the follow up on that day in the form of pop-up notification.
- The dummy Audit application was developed. This application was basically developed for PAC, it was initially developed in windows and then migrated to Web application. Application consisted on three forms that were dependent on each other; next form will only be inserted if the previous one is successfully inserted. It contains fields like year, ministry, time of audit, amount, DAC meetings on it, recommendations etc. After collecting all the information it generated a complete report and that can be printed as well. Language used was C# and the framework used was MVC.
- Attendance System was developed as a course project. It takes the attendance of students and generated the monthly report of each student. Sql database was used to store the date.

Several WordPress Projects (Company Projects)

Several Logos and Posters designed in Adobe Illustrator and Adobe InDesign (Company Projects)

Chipmunks Quest (FYP)

This game was developed in Unity 3D. It contained three modes: running, puzzle and 1d simple mode.
