## Experience

- Indus hospital** 2024 - Ongoing  
Medical officer  
Peads Oncology Emergency
- City International Hospital Quetta** 2022 - 2024  
Medical Officer  
In my current role, I am actively engaged in providing comprehensive healthcare in the Intensive Care Unit (ICU), Critical Care Unit (CCU), Medical Intensive Care Unit (MICU), Emergency Department, and General Ward. My responsibilities involve diagnosing and treating a wide range of medical conditions, managing critical cases, and coordinating with healthcare teams to ensure efficient patient care. This ongoing experience continues to strengthen my clinical expertise and underscores my dedication to delivering top-notch medical services.
- BHU Pashin (Adhoc)** 2022 - 2023  
Medical Officer  
Served as a dedicated doctor at BHU, providing comprehensive healthcare, Opd patient diagnosing and treating patients, and actively contributing to the well-being of the community.
- People's Primary Healthcare Initiative (PPHI)** 2022 - 2023  
Medical Officer  
Different projects:  
Contributed to health initiatives at BHU by organizing camps, actively participating in the Polio vaccination drive, and promoting awareness for Hepatitis, showcasing commitment to public health advocacy.
- Bolan Medical Complex Hospital Quetta** Aug 2021 - Sep 2022  
House officer  
1 General Medicine  
2 Paediatrics  
3 General Surgery  
4 Urology
- Imdad Hospital Quetta** 2021 - 2021  
Duty Doctor  
Neonatal care includes proficient management of newborns, addressing critical needs, and ensuring a supportive environment. Pre-operative care for general surgery and gynecology patients involves thorough assessment, preparation for procedures, and coordination of comprehensive medical interventions to optimize patient outcomes.
- Midtown Hospital Quetta** 2021 - 2021  
Duty Doctor  
Pre-op management involves assessing trauma orthopedic patients, stabilizing fractures, and optimizing medical conditions. Post-op care focuses on pain management, monitoring for complications, and initiating rehabilitation for optimal recovery.
