Summary

I'm Dr zarmina Agha..graduated from Bolan Medical College Quetta in 2022 with an MBBS degree and have improved my medical knowledge and skills via hands-on experience and continued professional growth. During my house job at Sandeman Provincial Hospital, and BMC hospital Quetta I had the opportunity to work alongside senior medical experts, obtain personal knowledge in numerous medical specialties, and hone my clinical abilities. As a result, my role as a Lady Medical Officer at DHQ Pishin allowed me to gain a better understanding of community healthcare needs, as well as valuable insights into the challenges and opportunities associated with providing healthcare services to underserved populations. Throughout my profession, I've Participated in a meeting about breast health at Bolan Medical College. Learned new things about breast cancer and how to take care of it. Want to use what I learned to help more people know about and prevent breast cancer Attended a fascinating session on hypertension at Sandeman Provincial Hospital in Quetta. Explored important information about managing high blood pressure. Excited to share and apply this knowledge for healthier living! I'm here to secure a challenging position in the medical field where my clinical expertise, compassionate patient care, and strong analytical skills can contribute to providing high-quality healthcare services. I aim to leverage my education and experience to make a positive impact on patient outcomes and contribute to the overall success of a dynamic healthcare team.

Skills

Communication Skills | Computer literacy ,time management, lead
