

Farhan Khan

ML and AI Engineer

About Me

AI and Machine Learning Engineer with 6-month experience in university projects. Skilled in developing, deploying, and optimizing high-quality AI projects. Proficient in Python and various Python libraries such as PyTorch, Scikit-learn, Pandas, NumPy, and Matplotlib. Experienced in working with AI algorithms, deep learning models, and data preprocessing techniques. Strong problem-solving and analytical skills.

Expertise Skill

- Python
- Git
- Machine Learning
- Natural Language Processing (NLP)
- Deep Learning
- Neural Networks
- Data Science
- Algorithm Design and Optimization
- Object-Oriented Programming (OOP)

 G9/4, Islamabad

Education

- 2021 - 2023
Air University, Islamabad
Master of Science in AI

Work Experience

- **Python AI Developer**
Air University, Islamabad | 2022 - Present
 - Designed and implemented machine learning models for predictive analytics and customer behavior analysis.
 - Optimized database queries and system performance to enhance application speed and scalability.
 - Implemented security measures to ensure the protection of sensitive user data.
 - Collaborated with a team of developers, data scientists, and business analysts to deliver high-quality AI solutions.
 - Presented the project to university faculty and received positive feedback for its innovative approach.
- **Projects**
Air University, Islamabad | 2022 - Present
 - Developed a Python project for machine learning and computer vision.
 - Built a machine learning model resulting with 97% accuracy.
