Profile

Experienced Business Intelligence Executive with a proven track record in optimizing supply chain operations and procurement processes. Skilled in designing efficient procurement item nomenclatures, tracking Procure to Pay (P2P) processes and analyzing supplier performance to drive cost savings and better negotiations. Adept at automating reporting systems, enhancing decision-making through data analytics, and delivering strategic insights to C-level executives using Power BI and Tableau. A results-oriented professional focused on reducing costs, increasing efficiency, and ensuring data-driven improvements in business operations.
