CAREER OBJECTIVE

Seeking a challenging role where I can leverage my extensive experience in research and analysis garnered from contributing to impactful projects such as the 'Flood Affected Area in 2022, District Charsadda (US Flood Research)' and the 'Survey of Traffic Plane 2040 for District Charsadda (PEPAC).' My career objective is to apply my expertise in data collection, analysis, and community engagement to drive actionable insights, contribute to sustainable development, and effectively address challenges in disaster management and transportation planning.

EXPERIENCE

FLOOD EFFECTED AREA IN 2022 DISTRICT CHARSADDA (US FLOOD RESEARCH)

Duration: Aug 2023 – Oct 2023

Responsibilities and Duties:

- Assisted in assessing the impact of the flood on infrastructure, communities, and the environment through data collection and analysis.
- Collaborated with a multidisciplinary team to document and analyze the immediate and long-term effects of the flood on the local population, economy, and infrastructure.
- Compiled and organized data sets, including demographic information, damage assessment, and environmental impact studies for comprehensive analysis.
- Engaged with affected communities to gather firsthand accounts and perspectives, contributing to a qualitative understanding of the impact.
- Contributed to the creation of reports, presentations, and visual aids summarizing the findings and recommendations for mitigation strategies.
- Utilized GIS (Geographic Information System) tools to map affected areas and visualize data for stakeholders and decision-makers.
- Ensured adherence to research protocols, ethical standards, and safety measures during fieldwork.
- Collaborated with government agencies, NGOs, and local authorities to share findings and propose initiatives for future disaster preparedness and response.
- Communicated research outcomes effectively to diverse audiences through presentations, reports, and community engagement initiatives.

SURVEY OF TRAFFIC PLANE 2040 FOR DISTRICT CHARSADDA (PEPAC)

Duration: Oct 2022 – Aug 2023

Responsibilities and Duties:

- Conducted extensive data collection for the "Survey of Traffic Plane 2040" project.

Gatherings and Learning:

- Two day's workshop on R, Hosted by Bacha Khan University Charsadda on September 2023.
- One day training workshop on Research, Hosted by Bacha Khan University Charsadda on 2-July-2021.
- International E. Conference on Advance in Economic and Social. (Attended as a Volunteer).
- Youth leadership conference. Islamabad, Pakistan. (Attended as a Participant).

Achievements

- Clean Room Award (Civilized Apartment award) 2020-2021
