**Local:** District Chaghi (Balochistan),

**Date of Birth:** 05/01/1986

**CNIC:** 54400-6385094-5

## **Summary**

With over 10 years of progressive experience starting from September 2014, I have taken on various roles ranging from grassroots-level positions to provincial leadership in humanitarian and development sectors. My work with prominent national and international organizations has equipped me with advanced expertise in strategic planning, leadership, and project management.

Throughout my career, I have successfully implemented a variety of development projects in key areas such as, health, and nutrition. My ability to ensure projects remain on track and achieve results while adhering to organizational and donor guidelines has been a key strength.

I have extensive experience in leading and managing health initiatives in complex emergencies across remote and disaster-affected districts of Balochistan, working with a range of institutional and bilateral donors. My expertise spans community development, emergency response, public-private partnerships, monitoring and evaluation, and linkage development. Additionally, I have contributed to disease surveillance and immunization programs, further broadening my impact in health and humanitarian sectors.

## **Work History**

**Additional support as Master trainer during PEI activities at district level, and also as monitor from line Department from January 2022 till date.**

**Duties:** Create comprehensive training materials and guidelines tailored to the campaign's objectives, including vaccination procedures, communication strategies, and community engagement. Ensure that training content is aligned with the cultural, social, and linguistic context of the target community. Oversee the development of visual aids, manuals, and digital resources for campaign staff. Conduct in-person or virtual training sessions for frontline health workers, team supervisors, and volunteers involved in the campaign. Provide practical demonstrations on campaign activities, such as how to administer vaccines, handle refusals, maintain data, and follow safety protocols. Engage trainees in role-play scenarios to help them practice communication skills, especially for handling refusals and addressing community concerns. Build the technical capacities of participants, focusing on vaccination techniques, data collection, cold chain management, and field safety. Identify gaps in knowledge or skills among trainees and offer targeted support to ensure all workers are competent before the campaign begins. Evaluate the understanding and skills of participants through assessments, quizzes, and feedback during and after training sessions.

**Provided services in Medical Camps, Organized by Health Department and supported by UNICEF, and Barrick Gold in the year 2023.**

**Dr. Muhammad Zohaib**  
**MBBS-MPH**

**Duties:** General OPD, examined 200 patients and elicited medical history data to use in assessing health and identifying conditions. Provide medical consultations, diagnose illnesses, and offer appropriate treatments to camp attendees, focusing on both acute and chronic conditions. Prescribe medications and ensure patients receive the correct dosage and instructions for their condition. Handle medical emergencies that may arise, including injuries, infections, and other urgent health concerns. Lead health screening programs, such as blood pressure checks, diabetes screening, eye exams, and other preventive healthcare activities. Administer or supervise immunization programs in the camp, ensuring children and vulnerable populations are vaccinated against preventable diseases. Provide education on preventive health measures, such as hygiene practices, sanitation, nutrition, and disease prevention, including information on communicable diseases like malaria or tuberculosis

**Working as Medical Officer on adhoc basis at DHQ Hospital Dalbandin Since February 2023.**

**Duties:** Patient Care: Provide routine and emergency medical care to patients, ensuring quality diagnosis, treatment, and follow-up. Prescription and Treatment: Prescribe appropriate medications, therapies, or other interventions as per diagnosis. Health Education: Counsel patients on preventive care, hygiene, and maintaining a healthy lifestyle, with a focus on communicable diseases. Medical Documentation: Maintain proper records of patient care, treatment plans, and outcomes following standard protocols. Disease Surveillance: Participate in the collection, analysis, and reporting of data for ongoing disease surveillance programs, particularly related to communicable diseases such as polio, measles, and other outbreaks. Case Investigation: Lead or assist in the investigation of disease outbreaks, actively participating in tracing and identifying cases, confirming diagnoses, and recommending control measures. Data Collection and Reporting: Ensure accurate and timely reporting of disease data to local and national surveillance systems. Collaboration: Work closely with district health teams, local government authorities, and other partners to strengthen surveillance efforts and ensure a coordinated response to outbreaks. Vaccination Campaigns: Assist in planning, organizing, and implementing immunization campaigns such as National Immunization Days (NIDs) or Sub-National Immunization Days (SNIDs) targeting diseases like polio, measles, and COVID-19. Cold Chain Management: Ensure the safe handling, storage, and distribution of vaccines, maintaining the cold chain to preserve vaccine efficacy. Community Engagement: Lead or support community outreach activities aimed at increasing awareness of the importance of immunization. This includes engaging community leaders and addressing vaccine hesitancy. Monitoring and Evaluation: Participate in post-campaign evaluations, helping to assess the coverage and effectiveness of immunization efforts and recommending improvements. Refusal Conversion: Identify and address vaccine refusals by interacting with communities and influencers, providing accurate information to reduce hesitancy.

**Worked as Medical Officer with PPHI under various project including International Rescue Committee Project, from January 2015 to January 2023.**

**Duties:** Provide primary and emergency healthcare to affected individuals, including diagnosing and treating illnesses and injuries. Ensure triage of patients during emergency situations, prioritizing those in critical condition. Administer first aid, basic and advanced life support, and refer severe cases to higher healthcare facilities. Monitor and manage communicable diseases, ensuring infection control measures are in place. Implement preventive healthcare measures, including immunizations (e.g., polio, measles) and health awareness campaigns. Conduct health screenings to detect potential outbreaks early and

**MBBS-MPH**

advise on interventions. Participate in surveillance activities to track and respond to emerging health threats like epidemics or disease outbreaks. Work closely with the Health Department, NGOs, and international partners to coordinate emergency health services. Act as a liaison between the community, healthcare providers, and emergency response teams. Assist in developing and updating contingency plans and protocols in response to emergencies. Train and supervise healthcare staff (nurses, health workers) on emergency medical protocols and care. Provide technical support to field teams in the provision of medical services during an emergency. Facilitate capacity-building sessions on public health, disease prevention, and management in emergency settings. Contribute to the resilience of local health systems, ensuring that facilities are equipped to handle the increased demand during emergencies. Ensure availability and distribution of medical supplies, drugs, and equipment for effective response. Monitor the quality of healthcare services delivered and ensure they adhere to national and international standards.

**Trainings:**
