● ABOUT ME

As an experienced professional in the pharmaceutical industry, I have developed a strong interest in leveraging data to make better decisions and optimize processes. In order to pursue this passion further, I am now seeking to transition into the exciting fields of data analysis and business intelligence, where I can apply my expertise and contribute to meaningful projects. I have strong organizational and interpersonal skills that I have developed in various roles. I will use my skills to contribute meaningfully to operations.

● WORK EXPERIENCE

CAREER AND EMPLOYABILITY INDUCTION COURSE University of Glasgow

ATTENDED WORKSHOP ON DATA WAREHOUSE AND BUSINESS INTELLIGENCE Dice Analytics

BASICS OF POWER BI Uniathena

POWER BI AND ITS COMPONENTS Greatlearning

This course equipped me with skills for entry-level roles in digital marketing and e-commerce. I explored entry-level jobs, understood organizational roles, and learned about the marketing funnel shaping customer journeys.

LEARNING EXCEL AND POWER BI Simplilearn

● DIGITAL SKILLS

Microsoft Office | Zoom | LinkedIn | Google Drive | Outlook | Organizational and planning skills | Decision-making | Good listener and communicator | Social Media/Social Networks | Digital Marketing

● ADDITIONAL INFORMATION

PROJECTS

Human Resource Data set I created a report in power BI to show employee demographics using visual aids. The report displays the number of employees by gender, marital status, and diversity factors using pie charts and bar graphs. The aim is to provide a clear understanding of the employee demographics to enable the organization to make informed decisions that will help improve workplace diversity and inclusion.

Canadian Store Data set In this project, I had the opportunity to work with a dataset from a Canadian store, leveraging the powerful capabilities of Power BI to derive meaningful insights and address specific tasks outlined in the assignment. The dataset consisted of comprehensive information related to the Canadian store, encompassing aspects such as sales, customer demographics, inventory levels, and regional performance. I Used Excel to analyze the data for Canadian store data set and created report in power

Diabetes Data set I created a report in Power BI to show what are the contributing factors in the prevalence of diabetes. How much prevalence is observed on the basis of gender, their lifestyle, and various other factors were visually analyzed.

Community Engagement Program A final year project, which involved multiple visits to an underprivileged community to educate them on self-diagnostic methods and provide nutritional awareness to prevent common diseases. This hands-on experience underscored the transformative impact that technology and education can have on healthcare outcomes, especially in underserved communities. The project involved the integration of innovative, user-friendly diagnostic tools and a comprehensive approach to nutritional awareness. This endeavor not only deepened my understanding of the real-world challenges in healthcare but also ignited a passion for leveraging solutions to address these challenges.
