Objective

Seeking a challenging position as a Laravel Backend Developer where I can utilize my skills and experience to contribute to the development of robust and scalable web applications. With a strong understanding of the Laravel framework, PHP, and database management, my objective is to deliver efficient and secure backend solutions that enhance user experiences and meet project requirements. I am passionate about writing clean and maintainable code, implementing best practices, and staying updated with emerging technologies in the field. By leveraging my problem-solving abilities and attention to detail, I aim to contribute to the success of the development team and help drive the growth of the organization.

Summary

I have extensive experience developing business and social websites, as well as the creation of RESTful APIs. With this expertise, I am confident in my ability to handle any project efficiently and deliver it on time. My focus on writing robust code ensures that applications run smoothly and efficiently, with zero bugs. Additionally, I possess strong skills in cloud server management, having successfully created multiple EC2 instances and installed LAMP servers. Overall, I bring a comprehensive skill set and a commitment to delivering high-quality applications to any development team.

Experience

Webexert ,Islamabad (FEB 2022 / till date)

Laravel Developer / Web Developer/Database Administrator

- Conducted requirements gathering sessions to gather project specifications and client needs.
- Oversaw and managed both mobile and backend development teams, ensuring effective collaboration and timely project delivery.
- Designed and implemented efficient database structures to support the application's data storage and retrieval needs.
- Utilized task management tools like Trello to organize and prioritize project tasks, ensuring smooth project execution.
- Developed and maintained administrative interfaces, allowing efficient management and control of the application's functionality.

- Implemented RESTful APIs using Laravel framework, enabling seamless communication and data exchange between different components of the application.
- Managed AWS instances and servers, ensuring their proper configuration, scalability, and security for hosting the application and its associated services.

eSquall Technologies Rawalpindi (Mar 2021 / FEB 2022)

Senior Laravel Developer/Database Administrator

- Conducted thorough requirements gathering sessions to understand project objectives, scope, and client expectations.
- Successfully managed backend development teams, providing leadership, guidance, and technical expertise to ensure smooth collaboration and efficient project delivery.
- Utilized task management tools like Trello to organize and track project tasks, ensuring timely completion and effective team coordination.
- Spearheaded the development and management of administrative functionalities, enabling streamlined control and efficient operation of the application.
- Developed RESTful APIs using Laravel and Node.js, leveraging their powerful frameworks to facilitate seamless communication and data exchange between different components of the application.

Ikonic IT Solution Rawalpindi (Oct 2020 / Feb 2021)

Laravel Developer/Web Developer

- Gathered project requirements to ensure clear understanding of client needs.
- Managed a team of backend developers, overseeing their work and ensuring successful project completion.
- Utilized task management tools such as Jira to effectively track and prioritize tasks.
- Developed and managed admin portals and REST APIs in Laravel to support the project requirements.
- Implemented live chat functionality using Node.js, enhancing user engagement and interaction.
- Developed RESTful APIs using Laravel and Node.js, leveraging their powerful frameworks to facilitate seamless communication and data exchange between different components of the application.

SKills
