Zain ul abadin khan
Software Engineer

My objective is to achieve excellence in a dynamic organization. I enjoy working as a part of an efficient team in a progressive environment. I am capable of working on my own initiative and possess excellent organizing abilities. I always work hard and efficiently to achieve my goals.

WORK EXPERIENCE

PRCS | Bannu

My Work As a data processing officer, My role involves managing and organizing data within an organization. I am responsible for collecting, processing, and analyzing data to ensure its accuracy, completeness, and security.

Rotary International 3272 | Bannu

My role is to handle and process data accurately and efficiently. i will be responsible for tasks related to data entry, verification, organization, and basic reporting. Your attention to detail and ability to manage data effectively will contribute to the smooth operation of data-related activities within the office.

Codify (Pvt) Limited | Islamabad

2 months experience as a web developer.At start i worked as a Frontend Web Developer. After successfully completing Web Designing then i moved on to Backend and completed basics about backend technologies using Laravel.

Btech-Groups | Islamabad

During my 8 months experience working with **WordPress**, I have Learned a comprehensive understanding of the platform and its functionalities. I began by familiarizing myself with the WordPress dashboard, exploring its user-friendly interface and various features.
One of my primary responsibilities was creating and customizing WordPress themes. I learned how to modify existing themes by tweaking CSS stylesheets and using PHP to enhance their functionality. Additionally, I became proficient in creating child themes to ensure that any modifications I made were not lost during theme updates.
I also delved into plugin management, installing and configuring various plugins to extend the functionality of WordPress websites. This involved researching and selecting suitable plugins, as well as troubleshooting any compatibility issues that arose.

World Health Organization | Bannu

My Works as a Data Surveillance Assistant at WHO, I played a pivotal role in gathering, managing, and analyzing epidemiological data. My responsibilities included ensuring data accuracy, detecting emerging health trends, and supporting timely responses to health crises. Collaborating effectively with diverse teams, contributed to evidence-based decision-making and assisted in enhancing data collection protocol thereby advancing WHO's mission to improve global health through data-driven strategies.

Data Liaison Officer | ICIMS

Data Liaison Officers (DLOs) play a crucial role in collecting and managing data related to community engagement and mobilization, particularly in campaigns focused on missing children. Their work modality involves ensuring data quality, integrity, means of verification, and timeliness. Key responsibilities include pre-campaign planning, such as collecting community engagement details and social profiling data, as well as intra-campaign activities like tracking still refusals and zero-dose children. Post-campaign tasks involve entering and validating data, cross-referencing information for accuracy, and adjusting timelines based on district or provincial working modalities. I collaborate with COMNeT Field Staff and participate in training sessions and meetings throughout the campaign phases.
