

Asalam'Alilkum

Today I came to CTC office to file a complain against my AS Shabana. My issued with her is that she manipulates the data, and remove children status from my MC Book. She used to misbehave with me in front of community. Even for my minor mistakes she used to complaint it to my mother. Always called us to her home even though the environment of her house is very bad, due to which I extremely dislike to go there. She has discussed my household matters in the UC. She always says that, she did not trust my work. She asks AS Saira to meddle in my area. She called her Companion to our kit Station, and then going with him for a drive in a car, which is not liked by the community. Asking the community to their phone numbers. I got Fed up from all of her theses activates and, I launch a complaint against her. I used to be alone in my area where she always visits other teams. When ever her mood is not good, she did not respond to any of our queries. She deceives the teams and create conflict among ourselves.
