### Section B: Analysis and Interpretation

Q. No.2): Each year between May- September nearly approximately 5000 families migrate from the Afghanistan and different districts of Balochistan, to Quetta. They move back between Septembers – November. Data shows that this population is responsible for transmission of virus between the provinces, and within the province. There is no resistance to immunization amongst these populations. They travel to Central districts of Balochistan for employment as daily wage workers, domestic workers, beggars and for grazing their cattle. A large population also avails health services from local Basic Health Units.

- a. What information is needed to ensure appropriate vaccination for these populations? (05 Marks)  
b. Once you have the information available what will be the key components of your plan to vaccinate these children? (05 Marks)

Ans(a) Information needed: Number of under 10 Year children.
