Dear Sir,
Thank you so much for your correspondence.

Sir, Microplanning is one of the major components for the assessment of the performance of not only the specified UC but at times it can bring the whole district into the state of failure due to compromising data.

We heavily rely on the UCPOs in terms of assessment of their respective UCs.

But unfortunately, on revalidation, the Microplan was not only deficient in a single component but also in Maps as well. However, the UCPO deliberately gave it the scoring of 100% to the UC which is a very serious misrepresentation of facts and figures on the part of UCPO.

As earlier communicated, the UCPO was also called up to give his side of view over such a blunder to which he admitted about the compromising status and lineincy towards the government staff (Area Incharges) before both of his supervisors (PEOs) at DPCR.

His part of explanation to the showcause is also not satisfactory at our side because such misreporting will eventually bring the image of whole organization down.

Furthermore, we would request you to proceed as per your rules and regulations.

Regards,
Dr. Sundeep / Dr. Sagar Singh
PEOs District Shikarpur
