Dear Rashida

Hope you are in good health. I want to inform you dear that I cannot continue this job because of my health issues as I have discussed with you on phone. Please accept my apology. I am so grateful for the effort you did for me.

Hope to hear from you soon for maybe next time. 😊

Best Regards

Hina Sahar

Subject: Measles Rubella Campaign Monitoring - Shift from KOBOLCollect to NEOC Mobile App

Dear Colleagues,

Let me communicate something very important for MR campaign monitoring. **It has been decided that all the campaign monitoring will be done through the mobile application developed by NEOC.**

Following monitoring checklists will be deployed on **NEOC app**:

Pre-Campaign Monitoring (**Deployed already**)

1. Training Monitoring Checklist
2. Microplan Desk Review Checklist
3. Microplan Field Validation Checklist

Intra-campaign checklists (to be deployed)

1. Observer Checklist
2. Rapid Convenience Assessment (RCA) Checklist

Credentials for mobile app are as under:

User: epi@neoc.org
Password: epi@431
(lower case)

Guide on how to install NEOC mobile is attached. Kindly note that this mobile app can be installed on both Android and IOS. There may be sometime a bug on IOS that app is not loaded properly therefore in that case killing app may help. Technical team is working and issue will be resolved soon.

A dashboard will be developed to visualize the monitoring checklists and credentials will be communicated next week in same email reply.

Please note: For admin data UCMO or 1st Level supervisors will use separate mobile app. We will communicate details separately

Kindly communicate this to all the monitoring tiers and ensure compliance. KOBOLlect app for MR Campaign Monitoring will be discontinued after 22 September 2021.

Best Regards

Shah Nawaz Jiskani
