Subject: Response regarding explanation called by CTC

Respected sir,

For your kind information, I have worked with CTC from July 2012 till 2016 in this program and then with WHO to till date in the same program which is a long term of about eight years. So when a worker dedicates along period of his life to a program, it needs no confirmation of his interest in the program and in such a long period of time none of my supervisors has reported me as irresponsible, uninterested and undutiful.

So far as my absentism is concerned in the said letter, it is only a misconception because my respective supervisor visited BHU Sando Khel only for 10 minutes during which I was present and busy in teams deployment in the old building of BHU while he was present in the new building, and you can verify my this statement from those who were present with me there.

During the second visit of my supervisor I was in the field and this you can confirm from Fazal Shah Epi AIC area Darwazgai who was present at EPI center due to routine immunization at the time of the second visit of my supervisor and he said to him that according to the instructions of FSMO I am working at routine immunization and my area will visit UCPO Abdur Rashid.

So I accept that I am not met with the supervisor but I was present at my duty station.

So I request in honour of you that in next time I will give no way to this kind of misconception.

Regards

Abdur Rashid
UCPO Sepai
