Dear Hina,

I hope this email finds you well. About these documents i got call from Ali Abbas after i started investigation found about gaps and Blunders in report as mentioned. He got back call from his sources, then he contacted me. I told him clearly regarding providing fake documentation is red line and no one is allowed to produce and provide such evidence to support any of reason. When he never visited the clinic how can a prescription original. Lab report have no header or footer and dates mentioned are of two years back how can that be original.

Evidence are clear and showing that those were produce purposely to get the benefits and to dodged the system.

Regards

As per i was informed by my supervisor about fake reports i contacted him and explained the scenario.

To be transparent , i was lacking of money and found a reference in children hospital for my test reports in free.

For the sake of following the rules the doctor i approached she made an error report date, but report was original.

After the scene i contacted with my supervisor and explained again everything to him and he assured me that he was clear and the reports was original.

I made him contact and check the scenario that its all transparent and real. He agreed and it was clear.

Last night i was again informed by my supervisor for the warning letter so now i have replied it also. For any kind of queries and proves i am here along with my supervisor.

Thank you

Ali Abbas
