R/ma'am

I have received information that SW Faraz Ahmed working at site Makkah Filling Station – 10040825, has used nozzle to fuel his own bike after duty time on Tuesday, 6-6-2023, as per site staff he came to site on bike with his brother and start refueling with his own. I am attaching pictures and voice received. (CCTV date and time is not properly set) As you know; there is no tolerance policy on Nozzle usage, so it is requested to take strict action against him as per HR policy.

Thank you
Barkat Ali
