Professional Accomplishment

- Developed an MIS from scratch named HRIS, in which automate the hiring process, manage bulk hiring and maintain 15000 record of employees having different type of disciplinary action with disciplinary letters and handling bulk contract printing through HRIS and trained the staff.
- Generate system generated contract, 15000 contracts in one hour.
- Considering the time taken to generate reports from statistical tools and then formatting them in MS Word for the final report of Wet. We developed an online system in which the researchers can generate reports of more than 200 questions and simply copy them in their report without any need of statistical tools or formatting of reports. With this application, the overall time of report generation had been decreased by more than half.
- Took charge as a software development team of the Benazir Income Support Program (BISP) project Waseela-e-Taleem (Wet) MIS. And developed an online field data entry application from the scratch.
- I developed an online system to keep record of the field activities and logistics details of the survey questionnaires.
- Organized and managed a 10 day training of the Waseela-e-Taleem survey questionnaires for our field staff of 13 districts across the country. During the training, I demonstrated and had given training of the usage and benefits of Wet online application for the field staff to the field enumerators and supervisors of 13 districts across the country, and got the best feedback by the field staff on the application
